# Task-1

## Business Model Canvas

Designed via [AltexSoft BMC Tool](#)

<b>Key Partnerships</b> <ul style="list-style-type: none"><li>- Metro rail operators and engineers.</li><li>- Government transportation agencies.</li><li>- Research institutions and universities specializing in structural health.</li><li>- Maintenance and repair service providers.</li><li>- Technology and sensor manufacturers.</li><li>- Data analytics and AI firms.</li></ul>	<b>Key Activities</b> <ul style="list-style-type: none"><li>- Implementation of sensor-based monitoring systems.</li><li>- Regular data collection and real-time monitoring of structures</li><li>- Analysis and interpretation of structural health data using AI/ML.</li><li>- Proactive maintenance scheduling based on insights.</li><li>- Collaborative design thinking workshops to innovate monitoring approaches.</li><li>- Continuous improvement through feedback loops and user-centric testing.</li></ul> <b>Key Resources</b> <ul style="list-style-type: none"><li>- Advanced sensors and IoT technology.</li><li>- Skilled engineers and technicians.</li><li>- Robust data storage and analytics infrastructure.</li><li>- Financial investments and funding for R&amp;D.</li><li>- Collaboration platforms for design thinking sessions.</li></ul>	<b>Value Propositions</b> <ul style="list-style-type: none"><li>- Ensuring safety and reliability for commuters.</li><li>- Minimizing downtime through predictive maintenance.</li><li>- Reducing operational costs by identifying issues early.</li><li>- Compliance with government standards and regulations.</li><li>- Enhanced structural durability and life-cycle management.</li><li>- Facilitating sustainable transportation systems.</li></ul>	<b>Customer Relationships</b> <ul style="list-style-type: none"><li>- Transparent communication regarding safety measures.</li><li>- User education campaigns about the benefits of monitoring systems.</li><li>- Proactive support and quick response to maintenance needs.</li><li>- Co-design with stakeholders to ensure alignment with user needs.</li></ul> <b>Channels</b> <ul style="list-style-type: none"><li>- Real-time dashboards for operators and engineers.</li><li>- Reports and insights shared with government bodies.</li><li>- Public awareness campaigns to highlight safety initiatives.</li><li>- Educational workshops for structural engineers and stakeholders.</li></ul>	<b>Customer Segments</b> <ul style="list-style-type: none"><li>- Metro rail operators and authorities.</li><li>- Government infrastructure and transportation bodies.</li><li>- Commuters (indirect beneficiaries of safer systems).</li><li>- Maintenance contractors and service providers.</li></ul>
<b>Cost Structure</b> <ul style="list-style-type: none"><li>- Initial setup costs for sensor systems and software.</li><li>- Maintenance and operational costs for monitoring equipment.</li><li>- Training programs for engineers and maintenance teams.</li><li>- Costs related to research and innovation (design thinking).</li><li>- Data storage and analytics platform expenses.</li></ul>			<b>Revenue Streams</b> <ul style="list-style-type: none"><li>- Service fees from metro rail operators.</li><li>- Government grants or funding for infrastructure safety.</li><li>- Licensing fees for software and AI models.</li><li>- Value-added services like predictive analytics packages.</li></ul>

## System Overview

Structural health monitoring system for metro rail networks

### System Performance

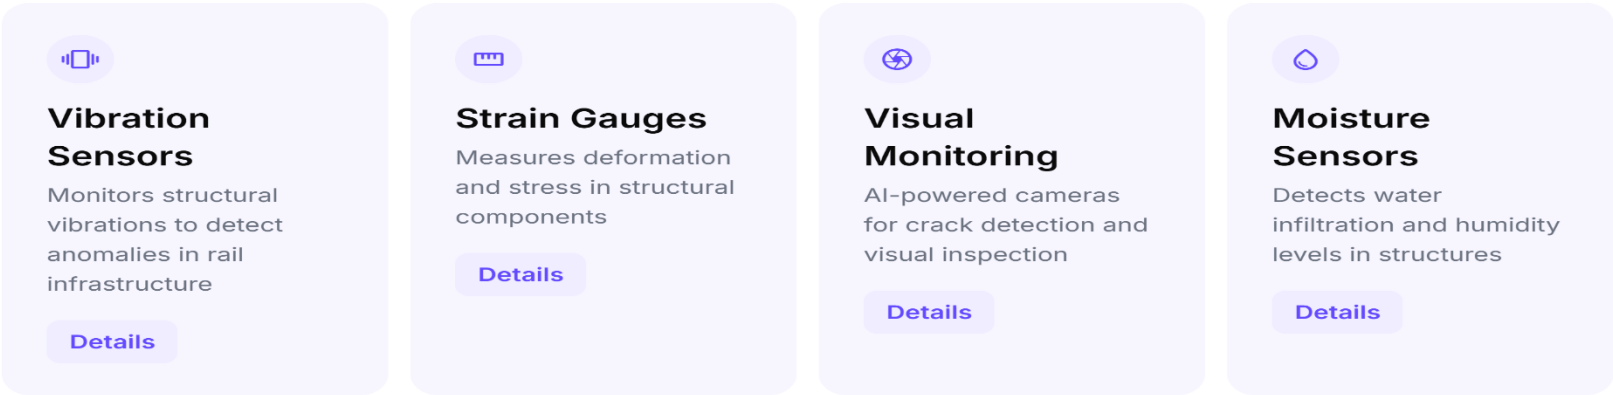

### Critical Issues

Track Displacement	Line 2 - Station 14	Critical	Detected 2h ago
Structural Crack	Line 3 - Bridge 7	Critical	Detected 4h ago
Vibration Anomaly	Line 1 - Tunnel 9	Critical	Detected 6h ago
Water Infiltration	Line 5 - Station 3	Critical	Detected 12h ago

[View All Issues](#)

### Monitoring Technologies

### Recent Maintenance Activities

	<b>Track Reinforcement</b> Line 2 - Station 12 • Completed 2 days ago	>
	<b>Sensor Replacement</b> Line 4 - Bridge 3 • Completed 3 days ago	>
	<b>Structural Inspection</b> Line 1 - Tunnel 5 • Completed 5 days ago	>
